

CentroGlide Bariatric²⁵⁰

Australia's bariatric power chair.

We developed the CentroGlide Bariatric to cater for weights of up to 250kg with the same easy drive capabilities as the standard CentroGlide. Designed and manufactured by Glide in Australia, the CentroGlide is the result of decades of experience, user feedback and refinement.

Completely customisable.

As a fully-scripted wheelchair, CentroGlide Bariatric is custom-built to the occupant's size and comfort requirements. The options are almost endless.

Mobility and independence.

The powerful motor gives the user the freedom to travel across grass, uneven footpaths, and ramps. CentroGlide has great manoeuvrability in tight spaces, and stability over kerbs. It comes with 50° seat tilt as standard, with options for vertical lift and anterior reach to allow the users to reach high shelves or transfer from the chair in a standing position.

Designed for comfort and ease of use.

We have put decades of user feedback and experience to develop all the features that make the CentroGlide Bariatric a fit for purpose, durable and robust chair.

Customised seating.

Many seating options available. For ultimate comfort, choose your customised cushion, backrest and headrest.

Active suspension.

Our patented 6-wheel APT suspension improves traction and aids ascending and descending kerbs safely without affecting the stability and angle of the seat.

Wheels.

CentroGlide has 12" drive wheels in either standard width and wide format. The front castor are 8".

Colour choices.

Choose from an extensive colour palette for the ultimate customisation.

Electronics.

Fully programmable R-net joystick control system. Compatible with many other 3rd party speciality electronics.

Power seating.

As standard, the seat has a 50° tilt with other options available including power recline and power leg rest elevation.

Battery range.

The powerful battery gives you a range of up to 40km on a single charge.

CentroGlide sets the benchmark.
